# Visiting Fellows Scheme

We are pleased to announce the second call for the Brazil Visiting Fellows Scheme 2014/15. The Scheme will provide early career university lecturers or post-doctoral researchers currently working at recognised universities in Brazil the opportunity to spend three months at the University of Birmingham carrying out identified research projects.

The aims of the Scheme are to:

- support the professional development of early career researchers at Brazilian universities
- enable visiting fellows to obtain insight into the organisation and conduct of research, training and administration at Birmingham University
- promote research collaboration between leading groups in Birmingham and Brazil through projects undertaken initially in the UK
- support partnership development and collaboration between the University of Birmingham and institutions in Brazil

We welcome applications to any subject area.

The Scheme will provide each visiting fellow with travel expenses of up to £850 and a monthly stipend of £1200 for three months to help cover living expenses and accommodation.  Accommodation can be booked on fellows' behalf and the cost deducted from the stipend.

A number of joint activities will be organised for visiting fellows during their stay in the UK, including a welcome reception, induction and social events.

The deadline for applications is Friday 13 February 2015.
