Flow Cytometry

Date(s) Monday 11th February 2013 (09:30-16:30)**Download**Add to Calendar

Flow Cytometry

This modular course is designed to provide a thorough grounding in the theory and application of Flow Cytometry. Basic principles, good experimental design, compensation and data analysis are all covered in depth, with additional modules selected to provide a customised curriculum. The generic nature of the courses ensures that it is applicable for any application of Flow Cytometry, and any brand of instrument or software.

Learning Objectives

To provide a thorough grounding in the theory and application of Flow Cytometry
To improve experimental design and data analysis
Cytometer and software independent to develop transferable skills

Who is this course for?

This course is suitable for experienced cytometrists or complete novices, and is interactive ensuring an optimised learning experience.
Biological researchers
Research Technicians
PhD Students
Research Supervisors
Clinical Cytometrists

Course details

Duration
One day

Location
Centre for Professional Development, College of Medical and Dental Sciences, University of Birmingham, Edgbaston, Birmingham, B15 2TT

Is this course accredited?
All delegates will receive a Certificate of Attendance

Fees
£150 per person

How to apply
Register for this course using a debit / credit card at our online shop.
