Astronomy, Chemistry, Computer Science, Mathematics and Physics

The University Library provides general and specialist research level collections of books, journals, and electronic resources for the study of the physical sciences.

Our collections are now heavily based on online material including electronic journals, databases and reference books, with an increasing number of online text books available

Our collections

Main Library

The **Main Library (https://intranet.birmingham.ac.uk/as/libraryservices/library/about/libraries/mainlibrary/index.aspx)** holds general and specialist research level collections in Astronomy, Chemistry, Computer Science, Mathematics and Physics, both books and printed journals are located mostly in Zone LGC.

A main strength of our collections is in our electronic resources. Some of these are available to visitors.

Other resources

Whilst most of the physical sciences stock is available from the Main Library, some more specialised areas relating to medical, dental, biochemistry, STEM and the history of science are housed at The **Barnes Library (https://intranet.birmingham.ac.uk/as/libraryservices/library/about/libraries/barnes.aspx)**, The **Ronald Cohen Dental Library (https://intranet.birmingham.ac.uk/as/libraryservices/library/about/libraries/dental.aspx)** and our **Education Libraries (https://intranet.birmingham.ac.uk/as/libraryservices/library/about/libraries/education.aspx)**. Older stock, particularly for physics related areas, is available on request from the Library Store.

Subject advisors

For further information on collection holdings or for advice on how to access our libraries and research materials, please contact:
