Study Biosciences in the UK

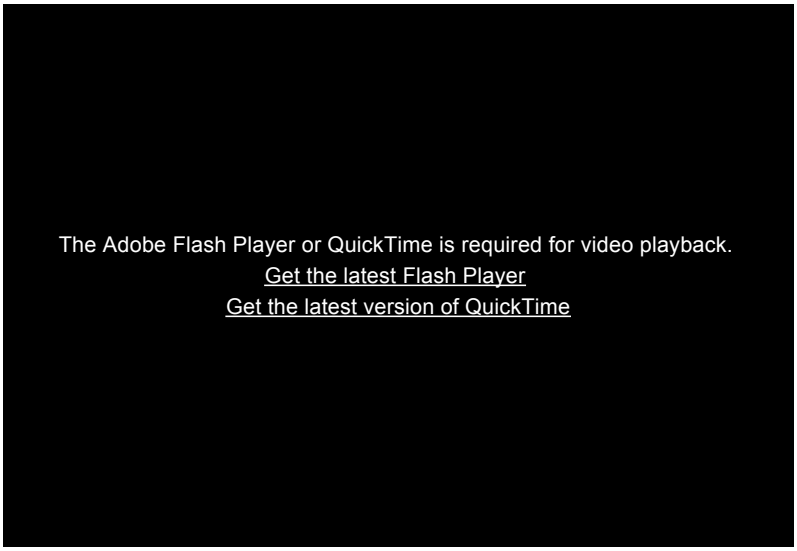
A partnership between Birmingham and two Chinese universities

Partnerships exist between the University of Birmingham, UK and the following Chinese universities:

- **Fudan University, Shanghai, China (http://www.fudan.edu.cn/englishnew/)**
- **Huazhong Agricultural University (HZAU), Wuhan (http://www.hzau.edu.cn/en/home/)**

These provide the opportunity for students to study and graduate with a Bioscience degree from the University of Birmingham.

In the video below, Bihe Chen talks about her experiences studying BSc Biochemistry as part of a 2+2 partnership programme with Fudan University in China. **Video transcript (/accessibility/transcripts/les/BSc-Biochemistry-2-2-Fudan.aspx)**



Use the « and » arrows above to skip between sections:

1. About the course
2. Research opportunities and lectures
3. Living in Birmingham / Accommodation
4. Clubs and societies
5. Bihe's future plans
6. Fitting in at Birmingham

Successful applicants recruited into the programme scheme will:

- Study Biological Sciences or Biotechnology for the first 2 years at Fudan University or HZAU
- Study for the next 2 years in the School of Biosciences at the University of Birmingham, UK

  Graduate with a Bachelor or Masters degree awarded by the University of Birmingham which will be recognised by Fudan University or HZAU

The programmes at Birmingham

- Students can study either Biological Sciences or Biochemistry
- We offer a wide choice of specialist modules which allow students to follow their own interests
- Teaching is delivered in a vibrant research-led environment by internationally recognised specialists
- Students have the opportunity to join one of the internationally renowned research teams at Birmingham to carry out their final year project
- Practical work will help students to develop their research skills
- Studying in the UK will help students to develop a more independent learning style in the enquiry based British education system
- The 'Professional Placement' programmes offer students the opportunity to spend an additional year working in the UK to gain further work experience
- The Undergraduate Masters programme (MSci) is a perfect springboard for any student wishing to study for a PhD, it provides a great opportunity to experience research at first hand and allows students to develop their research skills.

Scholarship opportunities

All students accepted through the partnership will be offered a scholarship equivalent to 25% of the course tuition fee. We are also pleased to offer 1 exceptional students the 'Head of College Scholarships' equivalent to an additional 25% of the course tuition fee.
