Surgical Oncology

This module will be taught by a blended learning approach with students doing a mixture of self directed and directed distance learning, combined with 3 days of intensive directed learning on campus. The module will require students to critically assess the evidence behind the management of solid tumours. Multidisciplinary approaches to perioperative care will be discussed, and the principles of surgical management, recent advances and future perspectives will be taught.

Learning Outcomes

By the end of the module you should be able to:

- Critically discuss the evidence for and current best practice in the surgical management of a range of tumour types, e.g. GI, Gynae, Urological, breast, hepatobiliary.
- Evaluate the issues involved in perioperative care and discuss the role of the multidisciplinary team members in helping to resolve these
- Critically discuss recent advances in surgical management, minimal access technique and modern imaging technologies
- Demonstrate an awareness of the future prospective of cancer management by surgery and where this fits into cancer management strategies as a whole.

Method of teaching

Blended learning with distance learning, e-lectures available in advance, 3 days of face to face tutorials and lectures.

Module Attendance Required

Distance learning materials available from the end of December. 3 day face to face sessions.

Module Dates
