Undergraduate degrees

Making important decisions in science and engineering is exciting, but transferring the knowledge and skills to the next generation gives us even more of a buzz. That is our main educational aim here in the College of Engineering and Physical Sciences.

Whether you're into cars or computers, robots or robust materials, there is a dynamic course for you, taught by experts who know how vital it is to find answers to tomorrow's problems today.

Our Schools are highly rated, making our graduates among the first off the blocks when it comes to getting a top job in industry or academia.

If you study with us, you will be at the cutting-edge of science with facilities to match – and there really is no more thrilling a place to be.
