About

Jayne is William Withering Professor of Medicine, Consultant Endocrinologist and Head of the School of Clinical and Experimental Medicine.

Jayne has published over 200 research papers, as well as review articles and book chapters, in the field of endocrinology, and largely on the topics of pathogenesis, treatments and long-term consequences of thyroid diseases (hyperthyroidism, hypothyroidism, goitre and thyroid cancer). Her research is supported by grants from the MRC, Wellcome Trust, CRUK and other medical charities.

She has been a longstanding teacher and mentor, in the fields of endocrinology and clinical academia, and now enjoys a much wider role in helping to drive forward a large portfolio of research and education spanning a wide range of clinical and basic science disciplines.

Qualifications

- FMedSci 2000
- FRCP (London) 1993
- PhD 1998
- MD 1995
- MRCP 1993
- MBChB (honours) 1979

Biography

Jayne Franklyn qualified MBChB with Honours from the University of Birmingham in 1979, having been awarded the Queen's Scholarship in 1978 and the Arthur Foxwell Memorial Prize for Clinical Medicine in 1979. She completed basic training in medicine, obtaining MRCP (UK) and then undertook a period of research as Sheldon Clinical Fellow and MRC Training Fellow, in the Department of Medicine in Birmingham, proceeding to MD and then PhD. She subsequently became Wellcome Trust Senior Clinical Fellow in 1988 and was promoted to Reader in 1993 and to Professor of Medicine in 1995. She became Head of the Department of Medicine in 2007 and was Associate Dean for the Graduate School from 2002-2008 before being appointed as Head of the School of Clinical and Experimental Medicine in 2008. She was conferred with the title of William Withering Chair of Medicine in 2011.

She has longstanding laboratory and clinical research interests focussing on the pathogenesis and long term consequences of thyroid cancer and autoimmune thyroid disease. Her work, and that of her team, has contributed significantly to our understanding of how best to treat thyroid disorders and to prevent their complications. She has been an active contributor to national and international guidelines for best practice. In recognition of her research contributions she was elected Fellow of the Academy of Medical Sciences in 2000 and has been awarded the Royal College of Physicians Goulstonian Lectureship, as well as Plenary Lectureships of the Society for Endocrinology, Clinical Endocrinology Trust, the International Congress of Endocrinology, the Endocrine Society of Australia and both Keynote and Paul Starr Lectureships of the American Thyroid Association. In 2012 she will deliver the Pitt Rivers Lectureship of the British Thyroid Association and Society for Endocrinology.

Teaching

- MB ChB course – 1st year endocrinology module
- Clinical teaching of 3rd and 5th year MB students

Postgraduate supervision

Jayne remains an active supervisor of higher degree students, projects including those examining clinical aspects of thyroid disorders through to basic mechanisms involved in thyroid tumourigenesis.

Research

Clinical research interests in thyroid disease – management and long-term consequences, especially cardiovascular; comparison of different treatment methods for hyperthyroidism. Prevalence of iodine deficiency.

Laboratory research interests in pathogenesis of thyroid disease (thyroid cancer and genetics of autoimmune thyroid disease, thyroid hormone action, especially in fetal

development

Other activities

- Consultant endocrinologist, University Hospitals Birmingham NHS Foundation Trust
- President of the British Thyroid Association
- Chairman of the Clinical Committee of the Society for Endocrinology

- Member JRCPTB Academic sub-committee
- Member RCP Joint Specialty Committee
- MRCP Part III Examining Board
- Trustee British Thyroid Foundation
- Trustee Gaddie Foundation
- Clinical Endocrinology Trust Trustee
- MRC/NIHR EME Programme Board
