

Since launching the *Circles of influence* campaign in 2009, we have had a remarkable level of support from our alumni and friends. This support has had a tremendous **[impact \(/alumni/giving/givingchangeslives.aspx\)](/alumni/giving/givingchangeslives.aspx)** on our research, our students, and our campus. We will now build on this momentum.

The second phase of the *Circles of influence* campaign is about enabling people. Whether this is enabling our researchers to make crucial breakthroughs, enabling disadvantaged students to get the education they deserve, or enabling people from all over the world to survive once-deadly diseases, our investment, combined with your generosity, will have far-reaching and long-lasting impacts.

Our new projects are grouped into the following themes. Together they help us achieve local, national, and international impact. Click on the themes below to learn more about our priority areas, our projects, and how you can support us.
