

Professor Jeff Bale, 'Living with Climate Change'

Locations	Haworth Building (Y2 on the Campus Map) - Lecture Theatre 101 - University of Birmingham
Date(s)	Monday 10th March 2014 (18:30-20:00)
Contact	To book or for further information please contact Rachel Wigglesworth r.a.wigglesworth@bham.ac.uk 0121 414 4691
Download	Add to Calendar (/events/events/prof-jeff-bale-living-with-climate-change.aspx?ical=true)

Part of the School of Biosciences' Spring Biology Lecture Series.

Jeff is one of the world's leading experts in the field of invertebrate thermal biology and how it is affected by components of climate change. His work covers aspects such as animal strategies for survival in polar environments, as well as understanding the establishment potential of non-native biological pest control agents. Jeff is Pro-Vice-Chancellor (Education) of the University, a former member of the 'Advisory Committee on Releases to the Environment' (ACRE) and of the Council of the British Ecological Society.

18.30 Refreshments
19:00 Lecture Starts

Cost: Free of charge, but booking is required
