Registration URL	http://www.amiando.com/GRABcon.html (http://www.amiando.com/GRABcon.html)

We've got 6 of our academics from across the University, talking to the theme of The Incredible Human Journey: past, present and future.

Professor Alice Roberts, author of this year's Great Read At Birmingham (GRAB) book will open the conference, and she will be followed by academic speakers talking on a diverse range of subjects, including:

- Dr Jeremy Pritchard on Darwinism
- Dr Vanessa Heggie on the history of medicine
- Dr Nick Hawes on human intelligence and robotics
- Dr Jeremy Williams on population ethics

All talks will be short (no more than 20 minutes) and aim to be inspirational and engaging.

Professor Alice Roberts will close the conference with a book signing session, and there will be ample opportunity to be actively involved throughout the afternoon.
