

## Health and Safety

FENAC conforms to regulatory requirements and advanced safety procedures regarding the use and disposal of nanoparticle products.

Following the University of Birmingham protocols for health and safety (<http://www.hsu.bham.ac.uk> (<http://www.hsu.bham.ac.uk>)), FENAC follows current **Health and Safety Executive regulations** (<http://www.hse.gov.uk>) for the disposal of all nanomaterial including carbon nanotubes and other HARN waste (See **Risk management of carbon nanotubes** (<http://www.hse.gov.uk/pubns/web38.pdf>)).

The University of Birmingham uses **PHS Waste management** (<http://www.phs.co.uk/wastemanagement>) to help with the treatment of nanoparticle and other hazardous waste
