Course Summary

"How to start a career in coagulation" is a one-day workshop designed primarily for haematology trainees, but newly appointed haematology consultants would also be very welcome to attend. It is timed to take place just prior to the **2012 ISTH SSC (<http://www.ssc2012.org/>)** in Liverpool and we hope attendees will also take advantage of the opportunity to register for the remainder of the SSC which looks set to be a stimulating meeting on a broad range of topics within haemostasis and thrombosis.

"How to start a career in coagulation" is split into a morning session focussing on trainees in research, and an afternoon session focusing on common on-call clinical problems in the field, and delegates can register for either the morning or afternoon session or for the whole day.

Who is this course for?

Haematology Trainees, Specialist Registrars and newly appointed Haematology Consultants

Duration

One day

Location

BT Convention Centre, Albert Dock, Liverpool

Fees

Registration for this day will be free based on generous educational grant funding from the **British Society for Haematology (<http://www.b-s-h.org.uk/>)** and pharmaceutical support.

How to apply

Please email your name, job title, place of work and details of whether you wish to register for the morning, afternoon or whole day to Gillian Lowe, g.c.lowe@bham.ac.uk (<mailto:g.c.lowe@bham.ac.uk>)
