

Management of Gynaecology in the Community

Date(s) Monday 20th (09:00) - Wednesday 22nd April 2015 (17:00)

Download [Add to Calendar \(/facilities/mds-cpd/events/gynaecology.aspx?ical=true\)](#)

Course Summary

This module is aimed at general practitioners and practice nurses working in the community required to develop competencies in the management of gynaecological disorders to an advanced level.

Learning Objectives

- Demonstrate systematic understanding of the theory and demonstrate ability to deal with complex issues underpinning gynaecological disease, prevention and management in the community.
- Demonstrate knowledge of the aetiology, pathophysiology and presentation of gynaecological disorders and the diagnosis and classification of gynaecological disorders.
- Evaluate critically the management of gynaecological disease and prevention of long term complications according to current guidelines.
- Explain the roles of the multidisciplinary team in gynaecological disease care to improve health outcomes (as recommended in relevant national policy documents)
- Manage gynaecological disorders in the community safely and effectively using the practical competencies acquired.
- Demonstrate an understanding of the requirements of clinical governance for gynaecological conditions, their management, developing audit tools and performance indicators to ensure services are being delivered to an acceptable standard.
