

Management of Hypertension in primary care

Date(s) Monday 9th (09:00) - Wednesday 11th February 2015 (17:00)

Download [Add to Calendar \(/facilities/mds-cpd/events/hypertension.aspx?ical=true\)](#)

Course summary

The course will provide you with skills and academic requirements for specialist clinical practice within the community. It uniquely combines academic and clinical aspects of community and primary care with practical sessions and summative assessment in practice by trained clinical assessors.

Learning objectives

- Demonstrate ability to deal with complex issues underpinning hypertension management in primary care
- Evaluate critically the prevention of long term complications according to current guidelines
- Understand the roles of the multidisciplinary team in hypertension to improve health outcomes
- Understand the requirements of clinical governance for hypertension management

The programme includes; an epidemiological overview, measurement of blood pressure, factors controlling or raising blood pressure, organ damage of hypertension, CVD risk assessment, evidence based treatment, QOF and protocol development and referral pathways.

Speakers

Professor David Fitzmaurice ([/staff/profiles/haps/PrimaryCareClinicalSciences/fitzmaurice-david.aspx](#)) – GP & Clinical Lead of Primary Care, UoB

Dr Ellen Murray – Senior Lecturer in Primary Care, UoB

Professor Richard McManus – Professor of Primary Care, University of Oxford
