Course Summary

This one day course aims to provide an evidence based approach to the management of common endocrine diseases in the community. It provides a unique opportunity for lively and interactive discussion between primary care physicians and experts on a wide range of endocrine disorders.

Learning Outcomes

- An understanding of how to interpret abnormal biochemical and endocrine test results, when to investigate further and when to consider referral
- An overview of recent national and international guidance regarding the management of thyrotoxicosis, thyroid nodules, subclinical thyroid disease and thyroid disease in pregnancy
- The identification of sight threatening thyroid disease
- How to manage various hormone replacement therapies in the community
- An understanding of the management of obesity in primary care
- The community management of adrenal gland disorders
- Practical advice regarding the diagnosis and treatment of polycystic ovary syndrome

Speakers

Professor Paul Stewart – Professor and Dean of Medicine, University of Birmingham
Professor Jayne Franklyn, William Whithering Professor of Medicine, University of Birmingham
