

University of Birmingham cements and creates new collaborations with Guangzhou

Posted on Monday 16th April 2012

Six months after the launch of the University's representative office in Guangzhou, the Vice Chancellor of the University of Birmingham is back in Guangzhou today to highlight the ongoing strategic partnership between the City and the University.

Vice Chancellor Professor David Eastwood will meet Vice Mayor Zhang Ji, and sign new collaborative agreements with three partner institutions; Sun Yat-Sen University, Jinan University and the Guangzhou Institute of Biomedicine and Health.

Since the launch of the office in September 2011, three first phase biomedical research projects are underway through partnerships with the municipal government and hospitals in the City. The projects are the Born in Guangzhou Cohort Study, the Guangzhou Biobank Cohort Study and the Birmingham-Guangzhou Brain and Cognition Centre.

Further collaborative research projects are being developed under the themes of environmental science, service industries and stem cell research, and latterly in the areas of engineering and physical sciences. In addition, the University's future plans include the development of an education centre, in partnership with a Guangzhou-based university partner, and a graduate school.

Professor David Eastwood, Vice Chancellor of the University of Birmingham, said:

"The University's collaborative reach in Guangzhou is increasing with vigour and our engagement with partners across the city continues to go from strength to strength. In keeping with our momentum, we are developing partnerships with industry, research institutes and universities based in Guangzhou, taking forward discussions around research collaboration, education and technology transfer. The MoUs I sign today, with Sun Yat-Sen University on research and graduate education, Guangzhou Institutes of Bioscience and Health on stem cell research, and Jinan University on our education programme, demonstrate excellent milestones for our sustainable and productive partnership with Guangzhou."

Accompanying the Vice Chancellor on this visit, Professor Edward Peck, Pro-Vice Chancellor at the University of Birmingham, added:

"This latest visit marks the University of Birmingham's long-term commitment to Guangzhou and the broader Pearl River Delta region. Our plans are wide-ranging; from research projects and business engagement to an education centre and graduate school. These developments align well with Guangzhou's social and economic development aims, as set out in the 12th Five Year Plan."

Notes to Editors

- Established in 1900, the University of Birmingham was the UK's first civic university where students from all religions and backgrounds were accepted on an equal basis. Birmingham's research power has global reach and 90% of the University's research activity is rated as 'world-leading' or 'internationally excellent'. It is a founding member of the Russell Group of UK research universities and there are 8 Nobel Prize winners amongst the University of Birmingham's alumni and academic staff. There are approximately 28,000 students at the University, including 4,000 international students from more than 150 countries. Around 1,000 Chinese nationals are currently studying on a range of programmes at the University. For further information, please visit: www.birmingham.ac.uk (<http://www.birmingham.ac.uk>)
- The University of Birmingham Guangzhou Centre (representative office) is a unique facility established in coordination with People's Government of Guangzhou Municipality to facilitate joint research and education initiatives in Guangzhou, the province of Guangdong and the broader Pearl River Delta region. Additionally, it supports knowledge transfer and engagement with business interests in the region, is a hub for research staff, and enables knowledge and expertise between China and the University of Birmingham to be shared. For further information, please visit: www.birmingham.ac.uk/guangzhou (<http://www.birmingham.ac.uk/guangzhou>)
- In addition to its Guangzhou Centre, the University has liaison offices in Beijing and Shanghai.
