

Cancer Sciences MRes

The Cancer Sciences MRes is a 1 year full-time programme that was introduced in 2013 to offer postgraduate training to suitably qualified science students who are interested in research careers in cancer. It is a stand-alone programme that would be of particular interest to students who wish to apply for further training at PhD level.

Details

Designed to offer life and biomedical science graduates the opportunity to gain research training through practical experience in a leading cancer research centre.

The programme consists of three introductory taught modules and an extensive project within a research group in the School of Cancer Sciences. The lecture modules will be taught by leading cancer experts and will cover such topics as the cellular and molecular basis of cancer, the pathology of selected cancers and how translational research is applied to diagnosis and treatment of cancers. The projects will generally be laboratory-based and will provide skills in designing and implementing research strategies to answer fundamental questions relating to cancer causes, diagnosis and/or treatment.

The skills and experience gained will be of particular benefit when applying to PhD programmes in cancer studies and related cell and molecular biology subjects.

Why study this course

Designed to offer life and biomedical science graduates the opportunity to gain research training through practical experience in a leading cancer research centre.

The programme consists of three introductory taught modules and an extensive project within a research group in the School of Cancer Sciences. The lecture modules will be taught by leading cancer experts and will cover such topics as the cellular and molecular basis of cancer, the pathology of selected cancers and how translational research is applied to diagnosis and treatment of cancers. The projects will generally be laboratory-based and will provide skills in designing and implementing research strategies to answer fundamental questions relating to cancer causes, diagnosis and/or treatment.

The skills and experience gained will be of particular benefit when applying to PhD programmes in cancer studies and related cell and molecular biology subjects.

Modules

Studying three lecture modules in association with MSc Clinical Oncology students will broaden your perspectives as you will be learning alongside students with experience in clinical aspects of oncology. Followed up with tutorials specifically for MRes Cancer Sciences students, you will develop your skills in critical analysis and presentation of research data.

The taught modules will be:

- Cellular and Molecular Basis of Cancer
- Introduction to General and Molecular Pathology of Cancer
- Translational Research in Cancer

After consulting with potential supervisors you will select a 30 week research project. The project will generally be laboratory-based within one of the research groups in the School of Cancer Sciences.

Being an integral member of an active research group will give you the opportunity to contribute meaningfully to ongoing cancer research in Birmingham, and provide you with a real insight into how this research is conducted.

Please note: programmes evolve continually to keep them up to date so please check the website regularly for any changes

Fees and funding

2015/2016 course fees:

UK/EU £7750

Non UK/EU £17850

Entry requirements

A Bachelor's degree (or equivalent) in the life sciences or biomedical sciences. We normally expect this to be at the 2(i) level or higher, but will also consider promising students who have not quite achieved this level.

Candidates from overseas for whom English is not their first language must meet the University's English Language requirement e.g. IELTS 7.0 (with a minimum of 6.5 in any band). **Full information** (<http://www.birmingham.ac.uk/Documents/students/admissions/pg-inteu-guide-2012.pdf>) on EU/International student entry.

International students:

Academic requirements

We accept a range of qualifications, our **country pages** (<http://www.birmingham.ac.uk/international/students/country/index.aspx>) show you what qualifications we accept from your country.

English language requirements

You can satisfy our English language requirements in two ways:

- by holding an **English language qualification to the right level** (<http://www.birmingham.ac.uk/students/requirements/requirements-pg/international/index.aspx>)
- by taking and successfully completing one of our **English courses for international students** (<http://www.birmingham.ac.uk/students/requirements/requirements-pg/international/english-courses.aspx>)

English to IELTS 7.0 (with a minimum of 6.5 in each component).

How to apply

When clicking on the Apply Now button you will be directed to an application specifically designed for the programme you wish to apply for where you will create an account with the University application system and submit your application and supporting documents online. Further information regarding how to apply online can be found on the **How to apply pages** (<http://www.birmingham.ac.uk/students/courses/postgraduate/apply-pg/index.aspx>)

Birmingham excels in world rankings (</news/latest/2014/08/birmingham-excels-in-world-rankings.aspx>)

Learning and teaching

As a Birmingham student, you will be joining the academic elite and will have the privilege of learning from world-leading experts, as well as your peers. From the outset you will be encouraged to become an independent and self-motivated learner. We want you to be challenged and will encourage you to think for yourself.

You will have access to a comprehensive support system that will assist and encourage you, including personal tutors and welfare tutors who can help with both academic and welfare issues.

Our facilities

The College of Medical and Dental Sciences houses state-of-the art facilities to support a range of teaching, learning and research activity.

Our facilities ensure that students receive the best possible learning experience by working in a modern environment. Among our most recent developments include a refurbishment of the Medical School foyer, Barnes library and Wolfson Centre for Medical Education.

Explore our facilities and take a tour by moving around our 360-degree panoramas:

ERROR:

Adobe Flashplayer 10.1 (or higher) or a
HTML5 Browser with CSS 3D Transforms or WebGL support are required!

Assessment methods

Assessment of the taught modules is either by a written essay or MCQ exam. The research project is assessed on the basis of a written dissertation that describes and analyses the work done.

Employability

On completion of the MRes Cancer Sciences programme, students will have developed key research and presentation skills that are sought by many recruiters into further postgraduate study at PhD level. These skills will also be applicable to other career pathways in the biomedical and health sciences sectors.

Careers Support for Postgraduates

Careers Network (<https://intranet.birmingham.ac.uk/as/employability/careers/index.aspx>) – We can help you get ahead in the job market and develop your career. We recognise that as a postgraduate student you are likely to have specific requirements when it comes to planning for your next career step. Employers expect postgraduates to have a range of skills that exceed their subject knowledge. Careers Network offers a range of events and support services that are designed for all students, including postgraduates looking to find their niche in the job market.

Here are just a few ways in which we can help postgraduates to get ahead:

- Careers Networking opportunities
- Effective careers strategy toolkit
- Year planner for all postgraduate students
- Masters Career Coaching Workshops
- One to one careers guidance

The Careers Network also have subject specific careers consultants and advisers for each College so you can be assured the information you receive will be relevant to your subject area. They also have a dedicated careers website for international students where you can find useful resources and information.

For more information on the PG Careers Network contact Jenny Mullins-White at j.mullins-white@bham.ac.uk (<mailto:j.mullins-white@bham.ac.uk>)
