Details

Organised by the Institute of Occupational and Environmental Medicine (IOEM) at the University of Birmingham this programme is designed to meet the needs of postgraduate training in the prevention and control of work-related ill health and to understand the issues of ill health and its effect on work in the 21st century. Open to graduates with relevant first degrees and those with appropriate work experience including doctors, nurses, hygienists, and health and safety personnel.

Why study this course

Aiming to develop the practitioner in occupational health and associated disciplines, this programme combines the academic and practical aspects of occupational health so that you can contribute to the development of occupational health services as well as improving practices and dealing effectively with management issues.

Benefits of studying this programme:

- The course focuses on current key topics including fitness for work, mental health, health screening, musculoskeletal disorders and management of health risk.
- Students with both clinical and non-clinical backgrounds benefit from understanding how workplace data can be collected and integrated to solve occupational health problems
- You have daily interaction with experts in occupational health and visits to workplaces enables you to put concepts into practice. The course will equip you to understand and solve a wide range of occupational health problems.
- The IOEM has a dedicated reference library and access instruments used for health screening and exposure monitoring.

International students

The course has a history of welcoming both home and international students to the IOEM. Since its inception, graduates of the course still maintain links with the Institute. This communication allows us to continually build working relationships at a national and international level. Recent graduates have been from the United Kingdom and countries including:

- Bahrain
- Ghana
- Greece
- Lebanon
- Nigeria
- Oman
- Zimbabwe
- Saudi Arabia
- Kuwait
- UAE
- Japan

Learning and teaching

- Teaching methods include formal lectures, tutorials, group work, case studies and workplace visits; the majority of lectures and practicals take place within the IOEM, which allows high-quality interaction between the academic staff and students
- The programme of teaching is supported by a variety of workplace visits that enable students to see at first hand the extent of occupational health in practice
- Each module includes tutorial time, providing an opportunity to re-address concepts and approaches to problem solving
- Learning is supported by the use of the electronic curriculum (Canvas), allowing students to access learning materials when away from the campus
- Every student on the programme has a personal tutor who can be contacted to discuss course material and understanding of specific topics as well as matters which may affect academic progress

Our facilities

The College of Medical and Dental Sciences houses state-of-the art facilities to support a range of teaching, learning and research activity.

Our facilities ensure that students receive the best possible learning experience by working in a modern environment. Among our most recent developments include a refurbishment of the Medical School foyer, Barnes library and Wolfson Centre for Medical Education.

Explore our facilities and take a tour by moving around our 360-degree panoramas:

Careers Support for Postgraduate Students

Careers Network – We can help you get ahead in the job market and develop your career

We recognise that as a postgraduate student you are likely to have specific requirements when it comes to planning for your next career step. Employers expect postgraduates to have a range of skills that exceed their subject knowledge. Careers Network offers a range of events and support services that are designed for all students, including postgraduates looking to find their niche in the job market.

Here are just a few ways in which we can help postgraduates to get ahead:

- Careers Networking opportunities
- Effective careers strategy toolkit
- Year planner for all postgraduate students
- Masters Career Coaching Workshops
- One to one careers guidance

The Careers Network also have subject specific careers consultants and advisers for each College so you can be assured the information you receive will be relevant to your subject area. They also have a dedicated careers website for **international students** (<http://www.as.bham.ac.uk/careers/international/index.shtml>) where you can find useful resources and information.

For more information visit the **Careers Network website** (<http://www.intranet.birmingham.ac.uk/careers>).
