

## Haemato-oncology

Neoplastic conditions of the haemopoietic and lymphoid systems are closely related and account for over 4000 deaths in the UK each year. Treatment of patients with haemopoietic malignancies involves a range of strategies such as transplantation, tyrosine kinase inhibitors and differentiation agents. This course is delivered by both clinical and non-clinical staff and there is a strong emphasis on current research and recent developments within the discipline.

### Credits

10 credits

### Module Attendance Required

4 days block of teaching

### Module Dates

2014/2015 dates

23 - 27th Feb 2015

### Assessment

3000 word assignment

### Academics involved in the delivery of this module

Dr Frederick Chen Honorary Senior Lecturer and NHS Consultant

### Stand Alone Course

This module can be taken as a stand alone course if required. For further information please contact:

Programme Administrator  
Tel: +44 (0)121 414 7672  
Email: [clinicaloncology@contacts.bham.ac.uk](mailto:clinicaloncology@contacts.bham.ac.uk)

### Fee if taken as a stand alone course
