

Neurodegenerative Disorders

This module aims to describe the main clinical features and the pathology of a variety of neurodegenerative disorders. You will learn about the biology of neurodegeneration, the clinical symptoms, course and prognosis. Particular attention will be paid to symptoms of mental and cognitive disorder, their diagnosis and management. The role of the multidisciplinary team in providing holistic care for people with neurodegenerative disorders will be emphasised.

Learning outcomes

By the end of the module you should be able to:

- Understand the main neurodegenerative disorders;
- Understand diagnosis and differential diagnosis;
- Understand neuropsychological testing;
- Understand psychiatric features of neurodegeneration;
- Understand management - bio/psycho/social/legal

Credits

10 credits

Module Attendance Required

3 day - block teaching

Module Dates

2013:
