

Research Methods (Distance Learning)

Module Overview

This module covers the techniques needed to critically appraise published research, and carry out a piece of original research. Topics include the scientific method applied to human services, literature search techniques, research design, sampling, the organisation of a research project, research ethics, measurement techniques, the analysis of qualitative and quantitative data, the presentation of results, and dissemination.

Learning outcomes

By the end of the module you should be able to:

- Complete a literature search on a defined topic.
- Prepare a research proposal with an appropriate research design, measurement, sample, and consideration of ethical issues sufficient to be approved by an ethical committee.
- Critically appraise a recent published research paper.
- Analyse a set of qualitative data.
- Analyse a set of quantitative data.

Credits

20 credits
