

Research Project 2

Module Overview

You join a research team and carry out a research project under the supervision of a member of academic staff. You will work independently, though your progress will be closely monitored and you will be given guidance when necessary. You will be required to write up your research results in the form of a research report which should be no longer than 5000 words.

You will also have a viva voce with two examiners who were not involved in the supervision of the project. The project supervisor prepares a formal report on performance in the lab, commitment, initiative and lab-book etc.

Credits

60 credits

Module Attendance Required

5 full days, 9am - 5 pm for 12 weeks

Module Dates

2010 - 2011 dates
9 May - 12 August

Assessment

By viva.

Academics involved in the delivery of this module

Dr Graham Wallace
Dr Stephen P Young
School of Immunity and Infection
College of Medical and Dental Sciences
