

Student Mentor Scheme

Our Mentor Scheme supports you with advice and guidance on any welfare-related issues you may face during your time in University accommodation. All our student mentors are fully trained and available to help you, from when you know you're coming to Birmingham, to when you move in and throughout your time with us.

The Scheme can help you with a wide variety of issues including:

- Shared living and accommodation-related issues, including advice on finding a house for your second year
- Your academic course, including support with the transition to independent learning, extenuating circumstances, exam stress and plagiarism
- Financial matters, including help with budgeting, extra sources of funding and employability
- Your general wellbeing, including emotional support to help you through any issues you experience, help settling in, advice on personal safety or simply someone to talk to

The Scheme also offers a variety of services throughout the academic year, including: a timetable of activity during Welcome Week; individual mentoring support; drop-ins during important times of the year; and mediation to help you work through any flat issues. And you'll receive useful information to help you tackle important student issues.
