

Systems biology of eukaryotes

Covered within systems biology of eukaryotes are the following research areas:

- Using expression profiling and Bioinformatics to model infection and immunity ([Dr Francesco Falciani \(/staff/profiles/biosciences/falciani-francesco.aspx\)](/staff/profiles/biosciences/falciani-francesco.aspx).)
- Growth factors, receptors and human disease ([Professor John Heath \(/staff/profiles/biosciences/heath-john.aspx\)](/staff/profiles/biosciences/heath-john.aspx).)
