

## Registration now open for conference 'The World Inside the Brain: Internal Predictive Models in Humans and Robots'

Posted on Monday 15th April 2013

Registration is now open for a one-day conference that will present research focusing on internal models across various fields such as psychophysics, neuroscience, and cognitive robotics. This event is jointly organised by postgraduate researchers from the School of Psychology and School of Computer Science of the University of Birmingham, and in association with the [Centre for Computational Neuroscience and Cognitive Robotics \(/research/activity/cncr/index.aspx\)](/research/activity/cncr/index.aspx).

The Conference will take place on **Friday May 24th 2013**, preceded by a CNCR workshop on **Thursday May 23rd 2013**. Registration is free and open until **May 17th 2013**.

For more information and to register see the [conference event page \(/research/activity/cncr/news/24May-wib-conference.aspx\)](/research/activity/cncr/news/24May-wib-conference.aspx).
