

National Evaluation of Specialty Selection (NESS)

This project evaluated a number of pilot selection processes and existing national selection processes for specialty trainees in the NHS. We collected data from over 4,000 applicants in the 2009 selection process to help us consider four key evaluation criteria: validity, reliability, acceptability and cost-effectiveness.

- Funder: Department of Health
- Project timetable: August 2008 to June 2010

Research Team

University of Birmingham research team:

- [Professor Hywel Thomas \(/staff/profiles/education/thomas-hywel.aspx\)](/staff/profiles/education/thomas-hywel.aspx)
- [Dr Celia Taylor \(http://medweb4.bham.ac.uk/ssp/Printable.aspx?id=1972\)](http://medweb4.bham.ac.uk/ssp/Printable.aspx?id=1972)
- [Dr Ian Davison \(/staff/profiles/education/davison-ian.aspx\)](/staff/profiles/education/davison-ian.aspx)
- [Dr Tian Qiu \(/staff/profiles/education/qiu-tian.aspx\)](/staff/profiles/education/qiu-tian.aspx)

Other members of the research team:

Professor Janet Grant (Open University)
Professor Stephen Field (Royal College of General Practitioners)
Dr Harry Gee (Birmingham Women's Hospital)
Dr Andrew Malins (Queen Elizabeth Hospital, Birmingham)
Dr Elizabeth Spencer (Gloucestershire Hospitals NHS Trust)
