

Structure and evolution of the Sabratah and Sirte Basin, Libya

This project is funded by the Libyan NOC using seismic, magnetic, gravity and well data to investigate the formation of two oil-producing basins.

Members of staff involved:

[Tim Reston \(/staff/profiles/gees/reston-tim.aspx\)](/staff/profiles/gees/reston-tim.aspx) (PI and lead supervisor); **[Steve Jones \(/staff/profiles/gees/jones-stephen.aspx\)](/staff/profiles/gees/jones-stephen.aspx)** (second supervisor Reeh) and **[Carl Stevenson \(/staff/profiles/gees/stevenson-carl.aspx\)](/staff/profiles/gees/stevenson-carl.aspx)** (second supervisor Saleem)

Research students:

Giuma Reeh
Mohamed Saleem

Project funding:

Fees and stipends for students paid by the Libyan National Oil corporation
