Persistent Organic Pollutants (POPs) - Environmental Health Sciences research (/research/activity/environmental-health/areas/pops/index.aspx)

Persistent Organic Pollutants (POPs) research is led by Professor Stuart Harrad. The Group's internationally leading role in this field is exemplified by hosting the 28th International Symposium on Halogenated Persistent Organic Pollutants in August 2008. As well as collaborations with UK partners, the group has strong active research links with organizations in Australia, Belgium, Canada, China, Egypt, Greece, Japan, the Netherlands, New Zealand, Norway, Sweden, and the USA.

Perspectives on Public Law lecture series (/research/activity/law/public/perspectives/index.aspx)

PEXIVAS Trial (/research/activity/mds/trials/bctu/trials/renal/pexivas/index.aspx)

The University of Birmingham Clinical Trials Unit. Plasma exchange and glucocorticoid dosing in the treatment of anti-neutrophil cytoplasm antibody associated vasculitis: an international randomised controlled trial. Multi-centre, international, open label, factorial design, randomized control trial in severe ANCA-associated vasculitis (AAV).

Philosophy of Education (/research/activity/education/philosophy/index.aspx)

The School of Education at the University of Birmingham, has a long tradition of work in philosophy which focuses on the conceptual and normative questions raised by educational policy and practice. It is currently home to one of the largest groups of philosophers of education in the UK.

Photobiomodulation and low level light therapy (LLLT) research (/research/activity/mds/domains/dentistry/tissue-injury-and-regeneration/photobiomodulation/index.aspx)

The therapeutic effect of light for disease treatment has been recognised for many centuries. In the early part of the 20th century exposure to sun and other natural light was commonly used to treat diseases such as dementia, tuberculosis, lupus vulgaris and acne. Currently UV light is used to treat patients with rickets (vitamin D deficiency), neo-natal jaundice, pain and a range of dermatological disorders.

Physiological Assessment of Animal Models of Health and Disease (/research/activity/mds/domains/cardio-resp-neuro/clinical-integrated-cardiovascular-science/physiological-assessment-of-animal/index.aspx)

Information on the Physiological Assessment of Animal Models of Health and Disease Group, led by Dr Andrew Coney, Section of Cardiovascular Sciences, School of Clinical and Experimental Medicine, College of Medical and Dental Sciences, The University of Birmingham.

Plant Genetics and Cell Biology - Research - School of Biosciences (/research/activity/plant-genetics-cell-biology/index.aspx)

One of the six research themes in our School of Biosciences, research in Plant Genetics and Cell Biology (PGCB) is focussed on the genetic and cellular control of plant growth and development in model species, crops and their wild relatives using genomics, proteomics, systems biology and advanced light microscopy.

PLUTO trial: Percutaneous shunting in Lower Urinary Tract Obstruction trial (/research/activity/mds/trials/bctu/trials/womens/pluto/index.aspx)

PLUTO trial: Percutaneous shunting in Lower Urinary Tract Obstruction trial

Polymer Engineering Research Group (/research/activity/metallurgy-materials/perg/index.aspx)

Research is carried out in polymer foam microstructure and micromechanics, impact testing of foams and foam products, crash helmet design, foams used in sports and Finite Element Analysis of foam deformation.

POLYPILL (/research/activity/mds/trials/pccrtu/trials/polypill/index.aspx)

Information on the POLYPILL trial - part of the Primary Care Trials Unit at the University of Birmingham.
