

Seminars

The MRC Centre for Immune Regulation ties into a wide variety of lecture and seminar programmes from across the College of Medical and Dental Sciences.

The John Squire seminar programme supports an international programme of speakers. This is complemented by 'in house' seminar programmes specifically designed to provide students and young investigators experience in presenting their work.

The [Birmingham University Stem Cell Centre \(/research/activity/mds/centres/stemcells/index.aspx\)](/research/activity/mds/centres/stemcells/index.aspx) (BUSCC) has a monthly seminar programme which brings in experts from both the research and industrial sectors to speak on the latest advances in stem cell research with a strong focus on the blood and immune systems.
