

## Health and Population Sciences research

The research domain of Health & Population Sciences (HaPS) encompasses expertise in the fields of primary care, public health and epidemiology, clinical trials, health technology assessments, health economics, occupational and environmental medicine, biostatistics, health services research, health care development and nursing.

Our research involves cross-disciplinary collaborations within the university and beyond, utilising some of the brightest minds and latest scientific technology in our quest to push back the boundaries of research in this field.

We are focused on two specific research themes: Healthcare Evaluation and Methodology and Primary Care and Population Health Research (including epidemiology).

### Research themes...

**[Healthcare Evaluation and Methodology \(/research/activity/mds/domains/health-pop/healthcare-evaluation-and-methodology/index.aspx\)](/research/activity/mds/domains/health-pop/healthcare-evaluation-and-methodology/index.aspx)**

**[Primary Care and Population Health Research \(including epidemiology\) \(/research/activity/mds/domains/health-pop/population-health-research-epidemiology/index.aspx\)](/research/activity/mds/domains/health-pop/population-health-research-epidemiology/index.aspx)**
