

Research Ethics

Research ethics is a growing area of interest for members of MESH. Recent work has focused on the issue of informed consent in research, how methodological issues relate to ethical issues, and conceptual work on distinctions between surveillance, research and practice.

MESH members active in this research area are:

Prof Angus Dawson

(</staff/profiles/haps/PrimaryCareClinicalSciences/dawson-angus.aspx>) Prof Heather Draper

(</staff/profiles/haps/PrimaryCareClinicalSciences/draper-heather.aspx>) Dr Jonathan Ives (</staff/profiles/haps/PrimaryCareClinicalSciences/ives-jonathan.aspx>)

Current funded projects:

- **Design and manufacture of novel food structures for the targeted delivery of bioactive components to the large intestine**
(</research/activity/mds/projects/HaPS/PCCS/MESH/research/Bioethics/project-4.aspx>)
- The Methodological and Ethical Issues Associated with Health-Related Quality of Life Measurement in Clinical Trials: (ME-QOL)
