

About

The cardiovascular programme is the largest within the Primary Care Clinical Sciences/PCRN/PCT partnership currently attracting research funding of over £4 million (£1 million per year) directly employing 30 staff. A wide range of research methodologies are employed. Lead primary care academic investigators work closely with secondary care academics, especially cardiology consultants, and Primary Care Trusts.

Key themes within Cardiovascular are:

- [Anticoagulation \(/research/activity/mds/projects/HaPS/PCCS/cv/research/anticoagulation/index.aspx\)](/research/activity/mds/projects/HaPS/PCCS/cv/research/anticoagulation/index.aspx)
- [Heart Failure \(/research/activity/mds/projects/HaPS/PCCS/cv/research/heart-failure/index.aspx\)](/research/activity/mds/projects/HaPS/PCCS/cv/research/heart-failure/index.aspx)
- [Hypertension \(/research/activity/mds/projects/HaPS/PCCS/cv/research/hypertension/index.aspx\)](/research/activity/mds/projects/HaPS/PCCS/cv/research/hypertension/index.aspx)
- [Rehabilitation \(/research/activity/mds/projects/HaPS/PCCS/cv/research/rehabilitation/index.aspx\)](/research/activity/mds/projects/HaPS/PCCS/cv/research/rehabilitation/index.aspx)
- [Stroke \(/research/activity/mds/projects/HaPS/PCCS/cv/research/stroke/index.aspx\)](/research/activity/mds/projects/HaPS/PCCS/cv/research/stroke/index.aspx)
