

## Publications

### Cardiovascular Research Team Publications available from University of Birmingham Research Archive (UBIRA)

The University of Birmingham Research Archive [UBIRA] is an online store of freely, publicly, permanently available full text research material produced by staff and researchers at the University of Birmingham. The repository acts as a focus for the University's research output and helps to manage the research process in future. It helps fulfil the University's mission to engender, encourage and disseminate scholarly work.

Material in the repository is available over the Internet and is indexed by search engines including **Google Scholar** (<http://scholar.google.com/>) and

**OpenDOAR** (<http://www.opendoar.org/>)

<http://www.opendoar.org/>). By making material freely available in this way it becomes more accessible worldwide, leading to greater visibility and impact of research carried out here at Birmingham.

#### Cardiovascular team research output

A comprehensive list of publications is currently being compiled, it will be made available in the near future.
