GloMY Trial Closed to Recruitment

The GloMY trial closed to recruitment on Tuesday 21st August 2012. The decision to close the trial to recruitment was made by the Chief Investigator and the Data Monitoring and Ethics Committee due to the low numbers of patients recruited into the trial. We aimed to recruit 100 participants in a two year period but the trial has only recruited 12 participants since October 2010.

We would like to say a very big thank you to all of the participants and collaborators who have taken part in and supported the GloMY trial. The trial was a pilot trial to assess the feasibility of running a larger full scale randomised controlled trial, so does serve to highlight the importance of running pilot trials in rare disease areas. We would like to continue to follow-up trial participants as per protocol so as we can gather as much useful information as possible.

Thank you again for your support of the trial and if you have any queries please don't hesitate to contact the [GloMY Trials Team](#) ([/research/activity/mds/trials/bctu/trials/renal/glomy/contact/index.aspx](#)).
