

Bioadhesion and biofouling

Bioadhesion and Biofouling research includes the following areas:

- Bioadhesives and adhesion mechanisms in algae in the context of marine biofouling ([Professor Jim Callow \(/staff/profiles/biosciences/callow-james.aspx\)](/staff/profiles/biosciences/callow-james.aspx))
- Biofilms and bioadhesion ([Dr Maureen Callow \(/staff/profiles/biosciences/callow-maureen.aspx\)](/staff/profiles/biosciences/callow-maureen.aspx))
