

Child-friendly laboratory

The **Infant and Child Laboratory** (<http://www.icl.bham.ac.uk>) is designed to be family-friendly. It includes a habituation lab and EEG equipment to measure electrical activity in the brain. There is also an observation room with cameras so children can be watched at play. The waiting area has comfortable seats and toys where other children can be minded by laboratory helpers.

The laboratory was partly funded by [alumni donations \(/alumni/giving/indexphase1.aspx\)](#).

Related projects

The laboratory is used to study the developing brains of infants and young children. Projects underway include:

- Testing influences on word learning
- Identifying biomarkers of autism
- Examining unusual feeding behaviours
