[The Bluebelle Study: Undressing wound infections \(/university/colleges/mds/news/2014/09/The-Bluebelle-Study-Undressing-wound-infections.aspx\)](/university/colleges/mds/news/2014/09/The-Bluebelle-Study-Undressing-wound-infections.aspx)

Wound infections are a common complication of surgical procedures, and contribute major costs for the NHS as well as pain, discomfort and inconvenience for patients. A new study will examine whether a main trial comparing wound dressings with no dressings is possible and whether dressings are effective in reducing infection and helping surgical wounds to heal.

[Things will never be the same again: reflections on the Scottish referendum \(http://www.birmingham.ac.uk/news/thebirminghambrief/items/2014/09/reflections-on-the-Scottish-referendum-18-09-14.aspx\)](http://www.birmingham.ac.uk/news/thebirminghambrief/items/2014/09/reflections-on-the-Scottish-referendum-18-09-14.aspx)

Written by Professor Colin Thain. Whatever the outcome of today's referendum of 3.5 million voters in Scotland, Friday 19 September 2014 will be an epoch-making day in the politics of these islands. For once, the hyperbole is justified.

[The Conversation: Ban pre-election opinion polls at your peril \(http://theconversation.com/ban-pre-election-opinion-polls-at-your-peril-31762\)](http://theconversation.com/ban-pre-election-opinion-polls-at-your-peril-31762)

Written by Chris Game. I really thought we might make it. We'd got past the publication of YouGov's potentially constitution-changing poll showing a minuscule lead for the Yes campaign without anyone grabbing for an easy headline by calling for opinion polls to be banned in the run-up to elections and referendums.

[Podcast: The Security Impact of Drone Warfare \(/research/activity/conflict-cooperation-security/news/2014/09/security-impact-of-drone-warfare.aspx\)](/research/activity/conflict-cooperation-security/news/2014/09/security-impact-of-drone-warfare.aspx)

From counter-terrorism operations in Afghanistan, to Amazon delivery services, the use (and ownership) of drone technology has major implications for domestic and international security. But what are the legal and ethical implications of this technology, and can drones ever be fully autonomous? Join leading experts for a topical and timely debate on the civilian and military use of drones.

[The Warship 'Anne' Returns to Her Final Resting Place \(/schools/eece/news/warship-anne-returns-final-resting-place.aspx\)](/schools/eece/news/warship-anne-returns-final-resting-place.aspx)

In an attempt to bring the 17th century to the 21st century, and building on a quadcopter site survey conducted in March 2014, a small group of researchers from the University of Birmingham have developed a highly detailed Virtual Reality model of the warship 'Anne', in collaboration with the Shipwreck Museum in Hastings and using historical book references and paintings. The University's Human Interface Technologies Team specialises in advanced simulation technologies for defence, healthcare and heritage applications and their aim on this occasion has been to stage what is believed to be the world-first "resurrection" of an historic vessel using Augmented Reality techniques, viewed from an unmanned drone in flight.

[Proton radiotherapy: hype, fiction and a few facts \(/news/thebirminghambrief/items/2014/09/Proton-radiotherapy-hype-fiction-and-a-few-facts.aspx\)](#)

Proton beam therapy (or our preferred title of proton radiotherapy), is a form of radiotherapy delivered with beams of high energy protons rather than the more usual beams of high energy x-rays (or less frequently beams of electrons). It is part of the general field of particle radiotherapy that includes use of particles that are heavier than protons. Beams of carbon ions are the main topic for clinical research around the world, although there is also interest in other particles such as helium ions.
