

Biosciences Professor to talk at First International Environmental 'Omics Synthesis Conference

Posted on Tuesday 23rd April 2013

Professor John Colbourne (<http://www.birmingham.ac.uk/schools/biosciences/staff/profile.aspx?Referenceld=45774&Name=professor-john-kenneth-colbourne>), Chair of Environmental Genomics, within the School of Biosciences is to be one of the keynote speakers at the First International Environmental 'Omics Synthesis Conference at Cardiff University 9-11 September 2013.

Registration is now open for this conference, the theme of which is: **Exploring the interface between the Environment and Informatics.**

Keynote Speakers:

- Professor Eske Willerslev, Centre for GeoGenetics, Natural History Museum of Denmark
- Professor John Colbourne, Chair of Environmental Genomics, University of Birmingham
- Professor Jack Gilbert, Earth Microbiome Project, University of Chicago

9 September 2013

'Omics technology training workshop - technologies, facilities and resources supporting environmental 'Omics.

10-11 September 2013

International Environmental 'Omics Synthesis Conference

- Learning from the past to inform the future
- Ecological 'Omics: from workflows to adaptation
- Epigenetics
- Evolutionary 'Omics: models and applications
- Integrated and Systems 'Omics
- Community ecology: from metagenomics to function and synthetic biology

There will be opportunities for platform and poster presentations.

For more information see the [International Environmental 'Omics Synthesis Conference website \(http://i037.bios.cf.ac.uk/envomics/ieos2013/\)](http://i037.bios.cf.ac.uk/envomics/ieos2013/).
