About

Research in Steve Busby's lab is concerned with understanding the molecular mechanisms that control gene expression in bacteria, with particular attention to studying the regulation of transcription initiation in *Escherichia coli*. Much of the recent work has focussed on the expression of virulence determinants in pathogenic strains.

Qualifications

- BA 1972 University of Cambridge, Natural Sciences
- DPhil 1975 University of Oxford

Biography

- Postdocs 1975-1979 Institut Pasteur, Paris & NIH, Bethesda
- 1979-1983 Staff Scientist at Institut Pasteur, Paris
- 1983 Lecturer at the University of Birmingham
- 1988 Senior Lecturer
- 1990-1995 Royal Society EPA Fund Research Fellow & Reader in Biochemistry
- 1995-present Professor of Biochemistry
- 2005 FRS
- 2006 Fellow of the American Academy of Microbiology

Teaching

I teach on undergraduate courses at all levels. My biggest contributions are a second year course on bacterial genes and genomes and a third year course on bacterial gene regulation

Postgraduate supervision

For a list of possible PhD projects offered by Prof Busby www.findaphd.com/search/customlink.asp?inst=birm-Biol&supersurname=Busby
(<http://www.findaphd.com/search/customlink.asp?inst=birm-Biol&supersurname=Busby>)

Former PhDs from the Busbylab include: Vas Ponnambalam (1984-1987), Bernard Chan (1985-1988), Sheela Jayaraman (1985-1988), Tim Peakman (1985-1988), Kevin Gaston (1986-1989), Andrew Bell (1987-1990), Matt Downham (1989-1992), Roy Williams (1989-1992), Jackie Williams (1990-1993), Kerry Tyson (1990-1993), David West (1991-1994), Virgil Rhodius (1992-1995), Jennifer Keen (1993-1996), Helen Wing (1993-1996), Steve Williams (1994-1997), Hui-chung Wu (1994-1997), Emma Law (1995-1999), David Lee (1996-2000), Tom Burr (1996-2000), Paolo Landini (1996-2000), Tamara Belyaeva (1996-2001), John Tebbutt (1997-2000), Andrew Sanderson (1998-2001), Joseph Wade (1998-2001), Mohamed Samir el Robh (1999-2002), Lars Westblade (1999-2002), David Grainger (2000-2003), Nora Miroslavova (2001-2004), Christina Kahramanoglou (2001-2004), Jennie Mitchell (pt time 2002-2009), Shivanthi Rodrigo (2004-2007), Sarah Piper (2004-2007), Meng Xu (2004-2008), Kerry Hollands (2005-2008), David Chismon (2006-2009)

Research

Research Theme within School of Biosciences: [Molecular and Cell Biology \(/research/activity/cellbiology/index.aspx\)](/research/activity/cellbiology/index.aspx)

Transcriptional regulation in bacteria

Steve Busby's work concerns the mechanisms by which the expression of different genes is regulated in bacteria. Working with *Escherichia coli* K-12, over the past 25 years, the lab has elucidated some of the basic rules of promoter recognition by RNA polymerase and some of the fundamental mechanisms by which transcription activators function (see reviews listed below).

The work with RNA polymerase has focused on the roles of the alpha and sigma subunits, whilst the work on transcription activation has developed from studies of the cyclic AMP receptor protein (known as CRP or CAP), which have established a paradigm for understanding transcription activation in bacteria. Early work with CRP, and with the related activator, FNR was concerned with simple promoters, such as the *E. coli lac* or *gal* promoters, where one molecule of activator is sufficient for full induction. Recently, the lab has turned its attention to more complicated promoters that are regulated by many different factors. Because bacterial gene expression is

exquisitely sensitive to the environment, the majority of promoters are complex and the lab has focused on cases where one molecule of activator is insufficient for full induction.

The work has identified two distinct and novel mechanisms for co-activation of a promoter by multiple activators.

Current active projects concern:

- Analysis of the molecular mechanisms whereby activation at CRP- and FNR-dependent promoters is coupled to other activators. These promoters function as integration devices that coordinate transcriptional responses to different environmental signals.
- How the activity of the major *E. coli* housekeeping sigma factor is regulated.
- The application of chromatin immunoprecipitation methods to bacteria to monitor the distribution in vivo of RNA polymerase, transcription factors and nucleoid-shaping proteins.
- Promoters that regulate the expression of some of the major virulence determinants of pathogenic *E. coli* (in collaboration with Mark Pallen and Ian Henderson).
- The relation between the activity of bacterial promoters and their location in bacterial folded chromosomes.

Collaborators

We collaborate with different groups on the UB campus, notably with Jeff Cole (on regulation of gene expression by oxygen and nitrate/nitrite), Dave Grainger (on bacterial chromosome folding), Josh Rapoport (on imaging), Mark Pallen (on LEE region regulation), Ian Henderson (on the enteroaggregative *E. coli* toxin) and Laura Piddock (on multidrug resistance in *Salmonella*). Overseas collaborators include Akira Ishihama (Tokyo), P-S Gunasekaran (Madurai), Kathleen Marchal (Leuven), Dom Schneider (Grenoble) and Victor de Lorenzo (Madrid). Recent overseas visitors have included: Marie-Carmen Martin (Badajoz), Kaneyoshi Yamamoto (Tokyo), Sandra van Puyvelde (Leuven) & Matej Butala (Ljubljana).

Current members of lab

- David Lee, Research Fellow (BSc, PhD, Birmingham): Interactions of bacterial RNA polymerase
- Jennie Mitchell, Research Fellow (BSc, PhD, Birmingham): Interactions of bacterial RNA polymerase
- Maritoni Sanchez-Romero, Research Fellow (BSc, PhD, University of Extremadura): *E. coli* chromosome biology
- Md Shahidul Islam, (BSc, MSc, Bangladesh Agricultural University): Regulation of LEE gene expression
- Jack Bryant, PhD student (BSc, Birmingham): Consequences of location on transcription in bacteria
- Patchawaran Ruanto, PhD student (BSc, Chiang Mai University; MSc, Birmingham): Genomics of NarL
- Laura Rowley, PhD student (BSc, York): CRP-dependent promoters
- Ghadah AlSharif, PhD student (BSc, King AbdulAziz University; MSc, Aberdeen): Regulation of LEE gene expression
- Rita Godfrey, Technician

Other activities

Vice Chair of the Biochemical Society

External Examiner for University of Cambridge Part II Biochemistry

Chair of CNRS-INSERM ATIPE-AVENIR Fellowship Microbiology Committee

Chair of Royal Society Dorothy Hodgkin Fellowships B panel

In 2010, Steve Busby gave invited lectures at: University of Glasgow (Wellcome Trust Centre); Old Swinford Hospital School (6th form); Trinity College, Dublin (Moynihan Institute); University of Nottingham (Institute of Genetics); University of Pablo Olavida (Seville); University of Seville (Dept Genetics); CNRS Gif-sur-Yvette (CGM); University of Leicester (Dept Microbiology); Indian Institute of Science Bangalore (Dept Microbiology & Cell Biology); Peking University (Beijing, China); Chinese Academy of Agricultural Science, Plant Protection Laboratory (Beijing, China).

In 2010, Steve Busby spoke at the following international meetings: Belgian Society for Microbiology Annual Symposium (Brussels); US-EC Biotechnology Task Force Workshop (Segovia); BACNET meeting (St Feliu); 15th Nitrogen Cycle Meeting (Birmingham); Ecole Thematique Microbiologie Moleculaire (Giens, France); 80th IBPC Anniversary Symposium (Paris); Vijiyoshi Camp 2 (Bangalore, India). US-EC Biotechnology Task Force Workshop (Segovia); BACNET meeting (St Feliu); 15 Nitrogen Cycle Meeting (Birmingham); Ecole Thematique Microbiologie Moleculaire (Giens, France); 80 IBPC Anniversary Symposium (Paris); Vijiyoshi Camp 2 (Bangalore, India).
