

## One year placements

Our **BSc Business Management Year in Industry** (</undergraduate/courses/business/bus-mgmt-year-in-industry.aspx>) programme is fast becoming our largest undergraduate programme, proving extremely popular with students and employers.

Students spend their first two years studying at the Business School, then undertake a full-time paid 33 week (minimum) placement in industry and return to the University to complete their degree in the fourth year.

### The benefits...

- An annual additional resource: competent, talented - quick and eager to learn
- An extended recruitment process: you get to know the students, they get to know you

The majority of our Placement Students are offered employment with their placement provider at the end of their degree.
