

Business Management Year in Industry Profile

Posted on Friday 27th January 2012

I spent my placement year at Debenhams in London and loved every second of it. I grew tremendously in confidence and came out the other side more focused and determined having secured a job offer for when I graduate; which is priceless. I was eager to return for my fourth year, to get back into activities like the Business School society and netball team, as well as volunteering with children through the Guild of Students.
