

## New MSc programmes for 2014

Posted on Thursday 20th February 2014

Birmingham Business School has grown its selection of available MSc degrees with the introduction of three new MSc programmes; MSc Financial Management, MSc Management and MSc Financial Economics.

### MSc Financial Management

This 12-month programme is designed for university graduates and aims to provide students with the knowledge, skills and qualification they need to work in the finance sector. The programme will give students a broader, and deeper, range of the knowledge and skills required for finance jobs than any of its kind currently available.

### MSc Management

#### With specialist pathways in 'Entrepreneurship & Innovation' and 'Strategy'

MSc Management and its specialist pathways are new specialist programmes designed for business, management or economics graduates who are looking to develop their knowledge to Masters level.

The programme introduces students to advanced management concepts through a combination of core foundation subjects before selecting one of two specialist pathways, or choosing a mixed pathway route, to tailor the course to their requirements.

- Find out more about [MSc Management: Strategy \(/postgraduate/courses/taught/business/management-strategy.aspx\)](/postgraduate/courses/taught/business/management-strategy.aspx)

### MSc Financial Economics

This programme will provide students with an advanced training in economics and in finance, acquainting them with recent developments and current issues in both areas. It will examine financial topics from an economics perspective and enable students to apply their analytical skills to financial markets.
