

Trials in the School of Cancer Sciences

The **[Cancer Research UK Clinical Trials Unit \(/research/activity/mds/trials/crctu/index.aspx\)](/research/activity/mds/trials/crctu/index.aspx)** (CRCTU) specialises in the design, coordination and analysis of phase I to IV cancer clinical trials.

The **[Birmingham Clinical Trials Unit \(/research/activity/mds/trials/bctu/index.aspx\)](/research/activity/mds/trials/bctu/index.aspx)** (BCTU) undertakes high-quality innovative clinical trial research in specialty areas other than cancer and primary care. Trials involve pharmacological, non-pharmacological or community based interventions.

Both of these Clinical Trials Units contribute to the **[Birmingham Centre for Clinical Trials \(/research/activity/mds/centres/bcct/index.aspx\)](/research/activity/mds/centres/bcct/index.aspx)** (BCCT) which brings together clinical trial expertise from across the University.
