

Postgraduate study

We offer a number of Taught Postgraduate courses and professional development training ranging across our areas of specialism. They are delivered by some of the UK's most respected clinicians and health professionals and are aimed at health professionals who wish to further their career.

The School of Clinical and Experimental Medicine aims to recruit the best postgraduate students and train them to the highest possible standards under the auspices of the Graduate School of the College. The School is a major stakeholder in the Graduate School and provides excellent supervision and research facilities. The School has over 100 postgraduate students currently registered.

Programmes available in the School
