

Civil Engineering professor joins BSI panel

Posted on Wednesday 9th November 2011

Professor Chris Baker (</staff/profiles/civil/baker-chris.aspx>), Professor of Environmental Fluid Mechanics and Director of the **Birmingham Centre for Railway Research and Education** (</research/activity/railway/index.aspx>), has been invited to join the Aerodynamics panel of the British Standards Institution (BSI).

This prestigious membership will allow Professor Baker to help ensure that the industry remains committed to values of quality and reliability, and is a great indicator of the esteem with which both Prof Baker and the Railway Centre are viewed across the sector.
