### About

Hywel Thomas is Professor of the Economics of Education and Director of the Centre for Research in Medical and Dental Education. His research includes work on: the economics of professional learning, continuing education in the health sector, resource management in schools and selection processes for specialty medical training. His work on GP education was recognised with an Honorary Fellowship of the Royal College of General Practitioners.

### Qualifications

- PhD
- MEd
- BA
- PGCE

### Biography

Hywel Thomas is Professor of the Economics of Education and Director of the Centre for Research in Medical and Dental Education at the University of Birmingham. He was Head of the School of Education for 10 years, from 1993 -2003.

Professor Thomas is an acknowledged leader in education on the national and international stage, leading major studies across a range of educational sectors. These include being the Principal Investigator of major studies on: resource management in schools (DFE/OECD), the changing nature of the school workforce (DfES), school based smoking prevention strategies (EU), the career paths of graduates (HEFCE), designing a curriculum for training medical general practitioners (RCGP) and evaluating selection processes for medical specialty training (DH). He has undertaken consultancies in the UK and overseas and his international work has taken him to over 20 countries including projects with The World Bank, UNESCO, the British Council and the Department for International Development (DfID). He has been Education Adviser to the British Council and specialist adviser to the OECD. He has authored nine books and published over 70 papers. His work on the education and training of general practitioners was recognised by the award of an Honorary Fellowship by the Royal College of General Practitioners.

### Teaching

His principal responsibility is the supervision of students registered for research degrees.

### Research

Research activity is in two main areas. The principal strand linking my work has been the application of ideas from economics to education. This has contributed to a diversity of projects, including work on the finance of schools and colleges, the career paths of graduates, the management of resources and the deployment of staff in educational institutions. A second strand is research on the economics of professional learning in the health sector and more recent work in other professions.

#### Research Grants

Since 1996, research grants and contracts for 15 projects with an income in excess of £4million
