

Student Projects and Recruitment

Many of our students undertake short projects or graduate into sectors such as water, mining and minerals, engineering, environmental and oil & gas industries.

There are therefore many opportunities for companies to get involved with our highest quality students before they graduate.

Every summer we have up to 20 students undertaking projects as part of the [MSc in Hydrogeology \(/postgraduate/courses/taught/gees/hydrogeology.aspx\)](#). These normally last 3 - 4 months. Contact [John Tellam \(mailto:j.h.tellam@bham.ac.uk\)](mailto:j.h.tellam@bham.ac.uk) for more details on 0121 414 6138.

Between October and Easter a number of students undertake short projects as part of the final year of their MSci degrees in Environmental Geoscience, Geology or Resource and Applied Geology.

Each year, a number of our students on [BSc Environmental Science \(/undergraduate/courses/gees/environmental-science.aspx\)](#) and BSc Environmental Management courses undertake a year out in industry to gain valuable practical experience relevant to their studies. For further information, contact [Dan van der Horst \(mailto:d.vanderhorst@bham.ac.uk\)](mailto:d.vanderhorst@bham.ac.uk) on 0121 414 5525.
