

One-day workshop: Characteristics and Impacts of Air Pollution: Recent Advances and Future Directions

Locations Room NG08 Biosciences Building – R27 on Edgbaston Campus map

Date(s) Wednesday 30th May 2012 (09:00-17:00)

Download [Add to Calendar \(/schools/gees/news/2012/30May12-ehs-onedayworkshop.aspx?ical=true\)](/schools/gees/news/2012/30May12-ehs-onedayworkshop.aspx?ical=true)

The aim of this one-day workshop is to enable knowledge-exchange as well as informal interactions with colleagues and peers in the field. The workshop is designed to be highly multi-disciplinary in nature and will allow people working across a wide range of thematic areas in the field of air pollution (including measurement and monitoring, modelling, health impacts, climate change, regulation and policy-making) to identify synergies and explore possibilities of collaborative work.

The keynote speakers at the workshop will be:

- Professor Roy M Harrison, Queen Elizabeth II Birmingham Professor of Environmental Health, University of Birmingham
- Professor Duncan Laxen, Managing Director, Air Quality Consultants Ltd. and Professor of Air Quality Management and Assessment at University of the West of England

This one-day workshop is organized thanks to the University of Birmingham's Roberts funding award 2012.

- The conference will be FREE for delegates to attend
- Refreshments will be available throughout the day: lunch, drinks and nibbles will all be provided free of charge
