Title of PhD: Geographies of Orphan Care in the Russian Federation

Supervisors: [Dr Dominique Moran \(/staff/profiles/gees/moran-dominique.aspx\)](/staff/profiles/gees/moran-dominique.aspx), [Dr Phil Jones \(/staff/profiles/gees/jones-phil.aspx\)](/staff/profiles/gees/jones-phil.aspx) (School of Geography, Earth and Environmental Sciences) and [Dr Jeremy Morris \(/staff/profiles/russian/morris-jeremy.aspx\)](/staff/profiles/russian/morris-jeremy.aspx) (Russian Studies)

Tom Disney is undertaking ESRC funded doctoral research into the spatial aspects of orphan care in the Russian Federation.

There has been a move within the social sciences, and particularly Children's Geographies, to see children and young people as social agents rather than passive recipients of adult knowledge and power (James et al. 1998). Similarly there has been a move within the Geographies of Health and Care to understand the social and cultural construction of spaces of care through the agency of the carers and the care recipients who use them (Milligan 2001, Philo 1987).

This research will bring together the sub-disciplines of Children's Geographies and Geographies of Health and Care to examine the ways in which orphaned children display agency within these spaces of institutional care, and the ways in which these spaces are socially and culturally constructed by the adults providing the care and the children as recipients of that care.
