About

Title of PhD: Manufacturing change: competitiveness and adjustment through evolving production relationships

Supervisors: [Professor John Bryson \(/staff/profiles/business/bryson-john.aspx\)](#), Professor Michael Taylor

Rachel is undertaking doctoral research into the adjustment practices of metal manufacturing firms in the West Midlands. The research project has engaged with local businesses through qualitative interviews and events to understand how firms react to challenges such as the global recession, climate change and globalization.

Qualifications

2008 MSc Applied Meteorology & Climatology (University of Birmingham)

2007 BSc Geography (University of Birmingham)

Biography

Rachel has a cross-disciplinary background in physical and human geography from her time at the University of Birmingham. She has been active in maintaining an interdisciplinary approach to her current research project through 'cross-over' methodologies.

Research

The firm and the value chain, the manufacturing sector, sustainability and adjustment

Research group

[Society, economy and environment \(/research/activity/hg/index.aspx\)](#)

Other activities

Another research interest of Rachel's is methodological training for early career researchers and research students, for which she has co-founded a research group with two fellow University of Birmingham colleagues. Through the research group, [Start2Finish \(http://www.start2finishresearch.com\)](http://www.start2finishresearch.com), Rachel has co-organised several workshops and sessions at international conferences, as well as an interactive website with a working paper series.
